7 **DECKS** come with free 36 grip tape of your choice—see page 27. Decks are available with wood or slick bottoms and come in a variety of sizes, listed with each deck. Wood decks are constructed of 7-ply maple. Slicks have an additional thin layer of plastic on the bottom which allows them to slide easier. Personal preference and experience best determine what size deck you should ride. The decks on pages 6-19 and 37 are good for all types of skating.

TRUCKS SILVER \$16⁹⁹ EACH COLORED \$18⁹⁹ EACH

Trucks come in various heights and widths. Truck axle width should be closely matched to your deck width—or just a little wider. Truck heights only differ by about 1/4". If you use bigger wheels then you should either use higher trucks, risers, or both to avoid wheelbite (contact of wheel with deck).

WHEELS \$5⁹⁹ each (unless otherwise noted)

There are two things to consider when choosing a wheel: the size and the hardness. The size is the diameter (height) measured in millimeters. The hardness is measured using the "A" durometer scale. The higher the number, the harder the wheel... the lower, the softer. Most of our wheels are good for street, ramp, and technical skateboarding. For cruising, look for big and soft wheels on page 31.

BUILD A CUSTOM COMPLETE Step 3—Wheels. Choose any wheel from pages 22-25, 31, or 37. Write your choice on the "Custom Complete Skateboard Order" form. The complete price listed under each deck includes premium parts, silver trucks and any \$5.99 wheel. You can upgrade your complete with Pig Wheels Turbinators, World Industries Hellholes, Big & Soft Wheels, or XT Dirt Wheels—look for the **U** symbol on pages 24-25 & 31. Next go to Step 4—Parts Packages—on page 26 OR separate included parts—on page 27 & separate upgrade

LONGBOARDS / BIG & SOFT WHEELS

Good for cruising and transportation. Big and soft wheels complement longboards by rolling smooth and fast. For best results use extra risers and wider trucks. CCS recommends Independent 156mm, 166mm, or 215mm trucks. Choose a truck with an axle width close to your deck width. To build a complete, follow the instructions on the "Custom Complete Skateboard Order" form.

C) IF YOU HAVE ANY QUESTIONS ABOUT YOUR ORDER—before or after you receive it—just call 1-800-477-9283 and ask for our Customer Service Department, Monday through Friday from 8 a.m. to 4:30 p.m. Pacific Time.

DECK GRAPHICS, DIMENSIONS & COLORS: Pros frequently come out with new deck graphics or change the dimensions of their deck. If you're set on the specific graphic shown, check with us to see if the pro has changed it. If deck dimensions change slightly (under 1/2") then we will send you the new shape, but if the shape changes drastically we will inform you of the change. And just to keep things interesting, the graphics and background colors of deck and wheel graphics will vary from one to another.

CLOTHING SIZES & COLORS: Everyone has their own idea of what XL really is. When ordering through the mail, a good rule of thumb is that bigger is better. Solid colored clothing comes in an assortment of colors, so we let you pick. Plaid or striped items may be different than pictured—if so we will pick one for you.

SHIPPING INFORMATION

DELIVERY: All CONTINENTAL U.S. shipments are by UPS Ground. Rush shipping is available in the U.S. via UPS for an additional charge—see the chart below. All orders shipped OUTSIDE the U.S. are charged according to current international rates via U.S. Mail, unless otherwise requested. UPS international shipping is available at current rates. If there are any delays or problems, we'll let you know. Parts of your order may be shipped separately depending on our stock availability. No backorders on international orders.

SHIPPING & HANDLING RATES: From the chart below, find the total of your merchandise order, your shipping destination, and choice of UPS service (if in the continental U.S.). Add the correct amount to the "Shipping & Handling" line above the "Total Due" line on the order form. CCS is not responsible for additional charges (taxes & duties) imposed by the customer's country.

BOARD SPECS

There are two main specs to consider as a starting point when selecting your new snowboard—length and waist width. The length is measured in centimeters from tip to tail. The waist width is measured in centimeters at the narrowest point of the board. This spec chart, arranged from shortest to longest lengths, is designed to make it easier for you to choose the right snowboard. First, use the Board Finder on page 3 to find the length and waist width range that is suitable for you. Then use these additional specs to find your new snowboard.

GLOSSARY

- Camber:** Reflects the board's arch as a vertical line measurement. This is a preset tension in the board that provides rebound in turns. A higher number is generally preferred in boards designed for freeriding.
- Effective Edge:** The length of the edge actually in contact with the snow when the board is flat.
- Height Tip—Tail:** Height of nose and tail measured in a straight vertical line from the snow surface — highly dependent on the lengths of the nose and tail.
- Length Tip—Tail:** A shorter nose and tail results in less swing weight for freestyle oriented boards. Longer measurements are better suited for freeriding and powder conditions.
- Setback:** Measures the orientation of the center of the stance from the center of the board.
- Sidecut:** The curve radius on the side of the board. A smaller measurement reflects a deeper sidecut and a board that turns more sharply.
- Waist Width:** The narrowest width measurement at the center of the board.
- Directional:** A board with different shapes at the tip and tail. All our directional boards have very subtle differences in the tip and tail. We won't send you a race board... just a good all mountain board.
- Freestyle:** A board designed for getting air, riding fakie and spinning tricks in the halfpipe or park.
- Freeride:** A board designed for all mountain riding (including freestyle), as much at home in the powder and trees as in the park.
- Twin-tip:** A board which has symmetrical tip and tail shape and measurements. Best for freestyle but also common for a versatile freeride board.
- Construction:**
- Sandwich:** Box-type construction with vertical sidewalls.
 - Cap:** Topsheet wraps to replace sidewall.
 - 360° Cap:** Same as Cap, plus nose and tail are capped also.
- Base:** The running surface of the board.
- Durometer:** Measures the hardness of the base. The higher the number the harder the base.
- P-Tex:** A branded polyethylene base material
- Sintered:** A manufacturing process which allows the base material to hold more wax.
- ABS:** A dense plastic that will not allow moisture to absorb into core. Improves impact strength.
